

Tech Mahindra and AT&T Bring AT&T FlexWareSM to More Businesses Around the World

Tech Mahindra Will Also Use the Solution Internally in Addition to Making it Available to its Global Clientele

Dallas, Texas – Jan. 23, 2018 – In yet another step toward expanding its relationship with AT&T*, Tech Mahindra, a specialist in digital transformation, consulting and business re-engineering, will now make available AT&T FlexWareSM to its global clients as well as use it internally.

AT&T FlexWare is a transformative, global network infrastructure solution. It reduces hardware requirements and streamlines operations so companies become more agile and responsive to their IT and business needs. The platform makes it easy to set up and manage virtual network functions (VNFs) on a single device reducing dependence on physical network appliances. This helps businesses become more agile and save costs.

Tech Mahindra intends to combine AT&T FlexWare with its System Integration and Services Portfolio, and offer the solutions to its global clientele who are undergoing digital transformation.

This collaboration will deliver a unique bundled offering of AT&T network and management services and Tech Mahindra's expertise in service management.

Ashish Julka, Senior Vice President, Tech Mahindra said, "This is another significant milestone in our strategic relationship with AT&T. AT&T FlexWare is a state of the art product which we believe delivers significant value to enterprise customers in their network transformation journey. With Tech Mahindra's strengths in System Integration combined with a transformative solution from AT&T, it is a win-win for all stakeholders."

"AT&T FlexWare enables intelligence at the edge that will help businesses analyze, protect and refine their networks. And it's adaptable. You can easily revise for future changes and incorporate new technologies to stay ahead," said Roman Pacewicz, chief product officer, AT&T Business. "Having Tech Mahindra on this journey with us will make the platform available to more businesses globally."

AT&T FlexWare is available in more than 200 countries and territories (subject to conditions), almost all of which are covered by Tech Mahindra's footprint.
